DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 recited the limitation "... and a predetermined digital valued W for driving said luminance enhancing sub-pixel so that a relation ship of $R_i:G_i:B_i = (R_o+W):(G_o+W):(B_o+W)$ is satisfied...". Although the specification does mention in Page 8, lines 6-12 the relation of $R_i:G_i:B_i=1(R_o+W_o):(G_o+W_o):(B_o+W_o)$ will be satisfied. There is no support for the cited relationship of $R_i:G_i:B_i = (R_o+W):(G_o+W):(B_o+W)$ is satisfied.

The examiner examines the application based on the best understood of claim language.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for

Art Unit: 2674

patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanioka (U.S. Patent No. 5,929,843).

In reference to claim 1, Tanioka discloses a liquid crystal display capable of displaying color image in which each main pixel unit including a red sub-pixel, a green sub-pixel, a blue sub-pixel and a luminance sub-pixel (see Fig. 2) comprising a processing circuit (corresponding to the calculation means) that outputting R'', G'' and B'' (corresponding to digital output values Ro, Go and Bo) for driving the red sub-pixel, green sub-pixel, a blue sub-pixel from the input sub-pixel R, G, B (corresponding to the Ri, Gi, Bi sub-pixels) and a predetermined value W from circuit 11.

In reference to claim 2, Tanioka discloses the formula $W = \text{Min}(R, G, B)$. As shown in Fig.4, when all the R,G,B color data is 255 i.e. 8bits, a white image is represented by the R,G,B color data, a minimum value among the R,G,B color data $\text{Min}(R, G, B)$ corresponds to a white component value (col. 3, lines 44-47).

In reference to claim 6, refer to the rejection as applied to claim 1.
